

Super Smart Air-conditioning

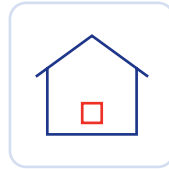

What does 'Super Smart' even mean?

Energy Efficiency

MyPlaceIQ is 46% more energy efficient year on year compared to a non-smart system.*

Customisable Comfort

There's no fighting like cat and dog over the temperature - everyone can have their room, their way.

MyPlaceIQ App

Our super smart app allows you to control your air-con, lights, garage and more from anywhere.

Creates a Super Smart Home

MyPlaceIQ is able to expand into a whole of home smart system, integrating with your lights, blinds, garage and more.

Controls Multiple Air-con Units

MyPlaceIQ can connect to and control multiple air-con units.

Compatibility

Compatible with all major brands
MyPlaceIQ can work with Daikin, Fujitsu, Panasonic or many other air-con brands.

*See myplace.com.au for more information.

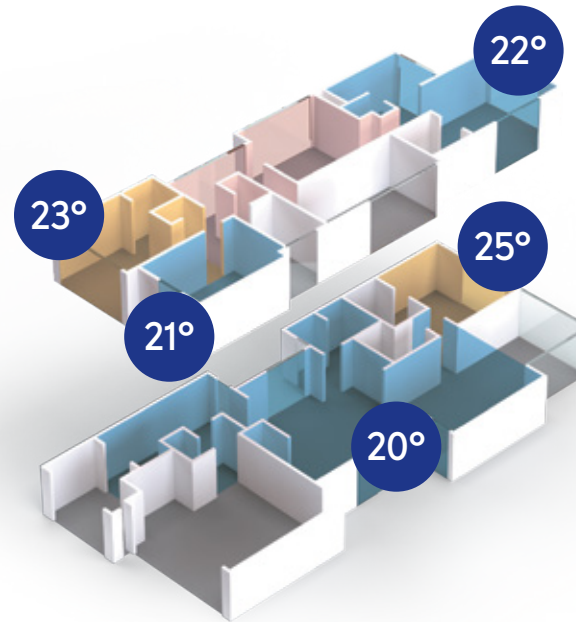

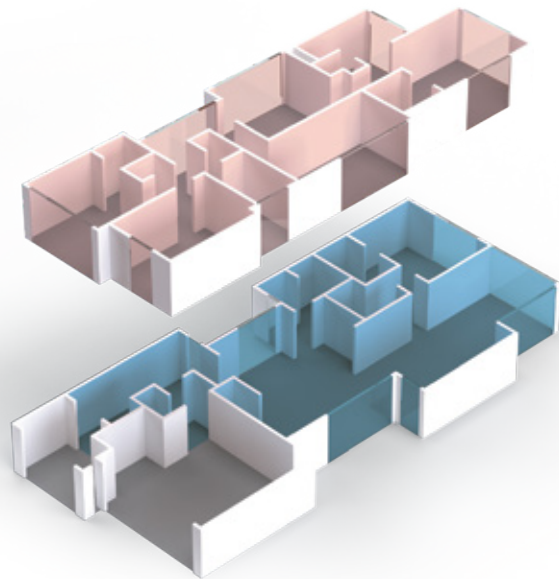

More zones, temperature control

Understanding Zones

Most ducted air-con systems installed across Australia are traditionally a 2 or 4-zone system. There is no climatic reason for this. It's just the way things have always been. It means right now millions of Aussie homes are energy in-efficient and using way more energy than necessary. MyPlaceIQ changes this.

A MyPlaceIQ system allows for up to 10 zones, with temperature sensors in each zone. This gives you the flexibility of being able to customise your air-con to ensure you have the exact number of zones that is right for your home.

We believe that more zones are better than less, because you get more control, comfort and energy savings. For example, if you zone and temperature control each room individually, everyone can have their room at their preferred temperature and by sending air to the bedrooms you're using, you can save on energy costs.

in every room and energy savings.

Understanding Temperature Sensors

We humans are very sensitive to temperature. We can feel 1° or 2° differences, and anything more than that can make us feel uncomfortable. We also all have different preferences when it comes to a comfortable temperature. Some people like 20°, others 22°, others 23° or 24°.

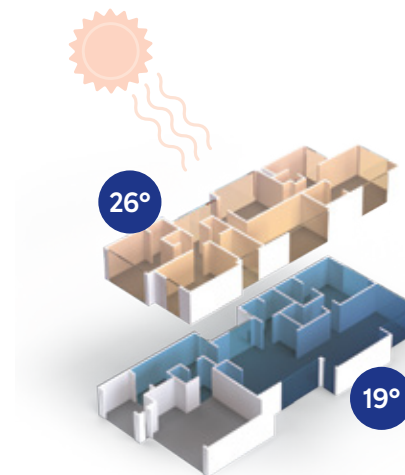

Temperature sensors keep each room at your chosen temperature throughout the day, making them perfect for...

- Two storey homes that have temperature differences between upstairs and downstairs
- West facing rooms that get a lot of afternoon sun
- Any rooms with a lot of glass that gets exposed to the sun
- Your own bedroom, so you feel super comfortable!

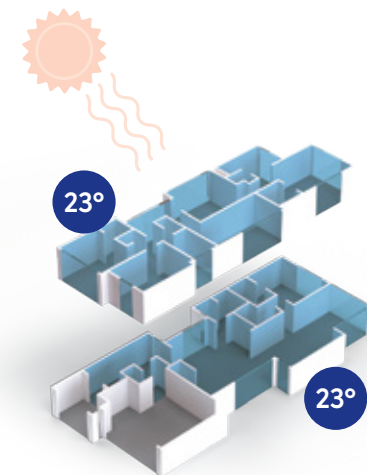

Consistent All-Day Comfort and Energy Savings

We especially recommend that you have temperature sensors in the east facing rooms because, without temperature sensors, those rooms will be over air-conditioned, making it uncomfortably cold and wasting energy in summer. The energy saving usually repays the cost of the sensors in only a few years.

Two-Zone System

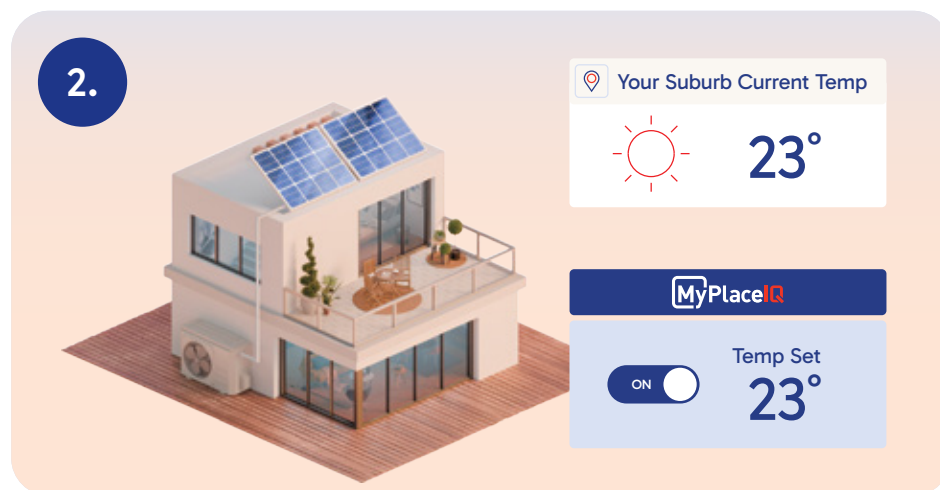

MyPlaceIQ

You can even chill the bills using solar.

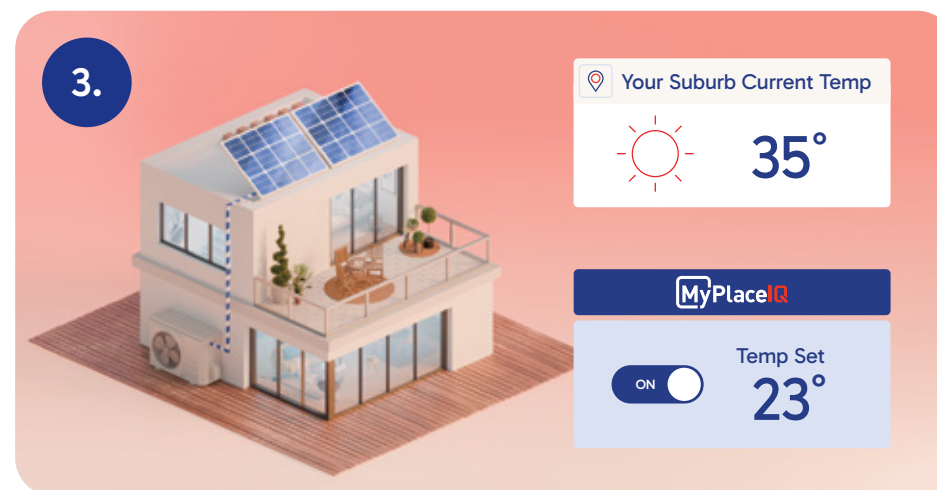

MyPlaceIQ can use solar power during the day to efficiently cool your home, so you don't have to blast the air-con when you get home and energy prices are at their peak.

When your suburb reaches your chosen temperature, it automatically turns on the air-con to cool your home.

MyPlaceIQ uses its super smarts to link to real time weather data to monitor the temperature of your suburb.

Because MyPlaceIQ is maintaining a temperature, it maximises energy efficiency and helps reduce your energy bills.

Cool cats love our Super Smart tech.

MyPlaceIQ App

Our Android and iOS app is your intuitive, easy to use control centre that communicates with the MyPlaceIQ Hub via home WIFI or when you're not home, via the internet.

MyPlaceIQ Hub

Plugs into your internet router, via the ethernet cable and communicates your instructions using your home WIFI.

MyPlaceIQ Temp Sensor

On the wall in your room, measures the temperature and MyPlaceIQ adjusts airflow to the room to keep it at the temperature you want, all day. There is also a button press option to turn the zone on/off as you enter and leave the room.

Making your whole home Super Smart.*

Super Smart Lights

Worried about the kids leaving the lights on? Don't want to come home to a dark house? The MyPlacelQ app lets you control your lights from anywhere.

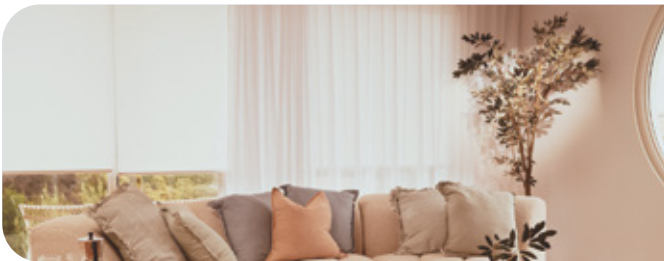

Super Smart Garage

Can't remember if you closed the garage door? MyPlacelQ knows when it's left open and alerts you, so you can close it using the easy-to-use app.

Super Smart Monitoring

MyPlacelQ makes you feel secure by looking out for your home when you can't with monitoring cameras and a video doorbell that you can monitor from your phone.

Blinds & Curtains

Speaker & Lightbulbs

Fans

*Some features not yet available, coming soon.

...with custom scenes to fit the occasion.

MyWelcome

- Turn on lights
- Open garage door
- Set air-con to 24°
- Switches monitoring on

Movie Night

- Dim lights
- Turn on speaker
- Lower blinds

MyGoodbye

- Turn off lights
- Turn off air-con
- Close garage door
- Close blinds

Supporting Australia's Coolest Customers.

Our Australia based customer support team is here to help you get the most out of MyPlacelQ.

White Glove Handover

Our locally based teams ensure a smooth installation and take care of everything for you. Then once your system is set up, they will walk you through how to get the most out of your Super Smart system.

Ongoing Support

Our technical support team is only a call away. Phone MyTeam directly, if we can't talk you through a resolution, we'll come out and help you in person.
